I've attached the meeting notes from today

meeting 31.10.23

1   #IP

prep
3   what do i actually submit, is it just one big word doc?
4   companies?
5

in meeting
7   submit everything as one pdf
8
9   context of what its done and what it will solve is good
10
11   big tank of water near electronics, thats a risk. spills and electrical hazard
12   chemicals and other stuff to be aware of, probably dont mention it in the risk assessment
13
14   tracer particles in a tank of water. tracers are a powder, dont inhale. used for powder painting, nylon powder
15
16   currently using shadows, maybe adapt the code to reflect that
17   slips, trips and falls – tape down cables and have them neatly
18   mop up spills
19   separate electronics from spills
20
21   training needs is good
22
23   milestone is basically "have i planned it" and to clear out misconceptions. Focus on the project now
24

internships
26   tsi - american
27   lavision – mostly in germany
28   dantech dynamics
29
30   john is running an internship, there are also other unis tho
31   andreas schöder at DLR is a good person
32   ICL has some partical tracking stuff
33   UCL, too Christoph Brücker
34   jobs.ac.uk
35
36   might be challenging to get a year in industry

for next time
38   lit review
39   get to grips with gigatrack
40
