PART B - Action Plan

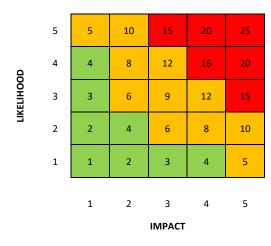

Risk Assessment Action Plan

| Part no. | Action to be taken, incl. Cost | By whom | Target date | Review date | Outcome at review date |
|-------------|--|-------------------------|----------------|----------------|--|
| | Move large items out of walkways | Technician | 29 Jan 2024 | | |
| | Undergo training for setting up DSE on Blackboard | Natalie Ko- Ferrigno | 22 Oct 2023 | 29 Oct 2023 | Completed and understood, 100% on the short test |
| | Ensure a mop is nearby and known so the spill can be cleaned | Natalie Ko- Ferrigno | 29 Jan 2024 | | |
| | Manufacture enclosures/shields for electronics | Natalie Ko- Ferrigno | 05 Feb 2024 | | |

University of Southampton Health & Safety Risk Assessment

Assessment Guidance

| 1. Eliminate | Remove the hazard wherever possible which negates the need for further controls | If this is not possible then explain why | 1 |
|------------------------|---|--|---|
| 2. Substitute | Replace the hazard with one less hazardous | If not possible then explain why | 2 |
| 3. Physical controls | Examples: enclosure, fume cupboard, glove box | Likely to still require admin controls as well | 3 |
| 4. Admin controls | Examples: training, supervision, signage | | 4 |
| 5. Personal protection | Examples: respirators, safety specs, gloves | Last resort as it only protects the individual | 5 |

Risk process

- 1. Identify the impact and likelihood using the tables above.
- 2. Identify the risk rating by multiplying the Impact by the likelihood using the coloured matrix.
- 3. If the risk is amber or red identify control measures to reduce the risk to as low as is reasonably practicable.
- 4. If the residual risk is green, additional controls are not necessary.
- 5. If the residual risk is amber the activity can continue but you must identify and implement further controls to reduce the risk to as low as reasonably practicable.
- If the residual risk is red <u>do not continue with the activity</u> until additional controls have been implemented and the risk is reduced.
- 7. Control measures should follow the risk hierarchy, where appropriate as per the pyramid above.
- 8. The cost of implementing control measures can be taken into account but should be proportional to the risk i.e. a control to reduce low risk may not need to be carried out if the cost is high but a control to manage high risk means that even at high cost the control would be necessary.

| Impa | act | Health & Safety | | | | | |
|------|---------------|--|--|--|--|--|--|
| | | | | | | | |
| 1 | Trivial - | Very minor injuries e.g. slight | | | | | |
| | insignificant | bruising | | | | | |
| 2 | Minor | Injuries or illness e.g. small cut or abrasion which require basic first aid treatment even in self- | | | | | |
| | | administered. | | | | | |
| 3 | Moderate | Injuries or illness e.g. strain or sprain requiring first aid or medical | | | | | |
| | | support. | | | | | |
| 4 | Major | Injuries or illness e.g. broken bone | | | | | |
| | | requiring medical support >24 | | | | | |
| | | hours and time off work >4 weeks. | | | | | |
| 5 | Severe - | Fatality or multiple serious injuries | | | | | |
| | extremely | or illness requiring hospital | | | | | |
| | significant | admission or significant time off | | | | | |
| | | work. | | | | | |

Version: 2.3/2017

| Likelihood | |
|------------|--|
| 1 | Rare e.g. 1 in 100,000 chance or higher |
| 2 | Unlikely e.g. 1 in 10,000 chance or higher |
| 3 | Possible e.g. 1 in 1,000 chance or higher |
| 4 | Likely e.g. 1 in 100 chance or higher |
| 5 | Very Likely e.g. 1 in 10 chance or higher |
